INSTRUCTIONS FOR OWNER / MANAGEMENT REVIEW

1. Purpose: This workbook establishes the authorized baseline for all 15 active commercial products and key claims published on nagdevproducts.com and official TDS PDFs. No numeric changes will be deployed without owner sign-off.

2. Pre-Flagged Items ("CHECK"): Parameters marked with a red CHECK badge indicate identified discrepancies, unusual compendial limits, missing parameters, or missing test conditions (temperature, cell size).

3. Yellow Input Column: In the Excel workbook (Column G, #FFF2CC), enter the authorized parameter value. If the current value is already correct, leave it blank.

4. Decision Column: Choose *Keep* to retain current value, *Change* if you provided a corrected value in the yellow column, or *Remove* to delete the item from published specs.

5. Pharma Monograph Testing: For BP, USP, Ph. Eur, JP, and IP grades, confirm monograph edition requested by buyer (results reported on COA), and whether independent inspection by SGS, Bureau Veritas or Intertek is requested at buyer's cost.

6. Plant & Packaging Claims: Review the Claims sheet for crushing capacity (50 TPD), continuous vs batch refining, derivative reactor specs, response SLAs, and solid bag packaging vs liquid containers.
